

The roadmap of PiKaChu

Q2 2021: We will complete the development of PiKaChu Protocol, and complete the cross-chain deployment of token contract on Ethereum, Binance Smart Chain and Huobi ECO Chain. At present, the project has launched Mdex and Pippi exchanges on HECO chain. In addition,, we will continue to recruit outstanding developers from all over the world to contribute to the PiKaChu Protocol. To increase the number of active users, more and more volunteers will participate in the community.

Q3 2021: We will complete the development of PiKachuSwap, a decentralized exchange, and deploy it in the mainstream public chains such as Ethereum, Binance Smart Chain and Huobi ECO Chain. After that, PKC token will soon be put on the main centralized exchanges such as Binance, Huobi and OKex.

Q4 2021: We will launch the NFT game DAPP exclusive to PiKaChu Protocol and put it on Google and IOS app store. At the same time, we will also actively expand the transaction scale of PiKaChu NFT market.

Q1 2022: We will integrate PiKaChu's international market and further expand our market scale in America, Europe and Asia. More offices will be set up in major first-tier cities in the UK, EU, USA, Japan and China, and there will be more partners joining us. In addition, we will set up a charity fund, and regularly carry out voting for charity objects and charitable donation activities.
